## **SUPPORTING LITERACY: VISUALISATION**

## **RIDER - visual imagery strategy**

- To aid in the comprehension of written material
- To help students remember more of what has been read (especially narrative and descriptive material).

R	Read	Read a sentence or short section of text.
I	Imagine	Imagine a picture of what you have just read.
D	Describe	Describe this picture to yourself.
E	Elaborate	Elaborate this picture, including details of clothing, colours, movement, setting, etc.
R	Repeat	Repeat the previous steps, gradually changing the original picture (like frames in a movie).

## Teaching example:

- Written material (descriptive material)
- Ask individual students "What do you see?"
- Encourage detailed images by asking students to close their eyes and visualise (elaborate).
- Teach RIDER.

Knight, Paterson & Mulcahy (1998), Strategies Program for Effective Learning and Thinking (Hawker Brownlow Education) p. 22

## **VISUALISATION STRATEGIES**

- 1. Start with familiar words/experiences.
- 2. Ask the student to "Make a picture inside your head".
- 3. Ask specific questions about colour, size, shape, etc.
- 4. Move onto short, concrete, descriptive sentences that are below their reading level. Read the sentence to the student and elicit responses. At a later stage, have a student read the sentence themselves either out loud or silently.
- 5. Later, increase the length and vary the subject matter.
- 6. Model how an adult would visualise.
- 7. Use many questions to check recall.
- 8. Gradually increase the length of the text to paragraphs, pages.
